

Jayvin Parmar

Full-Stack Developer — AI Systems — RAG — Automation — Data Dashboards

jayvin.parmar@gmail.com — 9892906068 — LinkedIn — GitHub — Portfolio

Education

B.E. Computer Engineering, Vidyavardhini's College of Engineering and Technology **2022 – 2026**
University of Mumbai **CGPA: 7.8/10**
Higher Secondary – PCM, Shri. T.P. Bhatia College of Science and Technology
Schooling, St. John's High School

Technical Skills

- **Languages:** Python, JavaScript, TypeScript, SQL, C, C++, Java
- **Frontend:** React, Vite, Tailwind CSS, HTML5, CSS3, Material UI, Swagger
- **Backend & APIs:** FastAPI, Node.js, Next.js, Express.js, REST APIs, JWT Auth, Socket.io
- **AI & Data:** LLMs, RAG, Embeddings, Vector Search, Document Parsing, Pandas, NumPy, CSV Processing
- **Databases & Tools:** PostgreSQL, MongoDB, Firebase, Git, GitHub, Docker, Postman, Linux, Excel, Power BI, Supabase
- **Core CS:** Data Structures, Algorithms, OOP, DBMS, Operating Systems, Computer Networks

Selected Projects

AskSheets AI – AI Spreadsheet Analyst GitHub

- Built a CSV analysis workspace where users upload datasets, preview tables, and ask natural-language questions to generate summaries, charts, and insights.
- Designed React + FastAPI architecture with Python/Pandas data processing and LLM-ready analysis workflow.

HR Flow Agent – HR Operations & Candidate Tracking System GitHub

- Developed an HR workflow dashboard for candidate pipelines, employee records, approvals, role-based views, and HR analytics.
- Structured backend-ready modules for authentication, candidate management, employee records, and dashboard metrics.

AuditPal – AI Compliance Document Assistant GitHub

- Built a compliance assistant for document upload, clause extraction, risk summaries, and source-grounded Q&A using a RAG-ready workflow.
- Designed modules for document parsing, embeddings, vector search, audit history, and compliance review workflows.

Research Experience

Genesage: Advanced Genomic Variant Pathogenicity Analysis via the Evo2 Foundation Model 2026

- Published research on a full-stack genomic variant analysis platform using Evo2, FastAPI, Next.js, Modal GPU infrastructure, PostgreSQL, and genomic APIs.
- Proposed workflows for gene search, reference genome retrieval, variant input, ClinVar comparison, confidence scoring, and result visualization.

Leadership & Experience

Microsoft Learn Student Club – AI/ML Coordinator 2024

- Coordinated AI/ML initiatives, mentored students on project execution, and conducted workshops on Python, ML pipelines, and applied AI systems.
- Built and supported AI-based prototypes across NLP, automation, and data analysis use cases.

Student Council & Campus Activities Coordinator

- Helped coordinate college fests, technical competitions, and student-led activities; participated in debate, chess, volleyball, table tennis, and Valorant events.

Achievements & Certifications

- **Hackathons:** DSA Hackathon Finalist – Top 5, MLSC 24-Hour Hackathon Finalist, Avalanche 24-Hour Hackathon Finalist.
- **Events:** Helped organize Abacus Tech Event with 500+ participants.
- **Certifications:** Infosys Springboard Python Fundamentals, Infosys Springboard Java Fundamentals, VPNs Certificate, ABACUS Event Participation Certificates.

Core Strengths

- Full-stack product development • AI systems • Data-driven problem solving • Automation-focused thinking
- Fast execution
